November 3, 1994

TO: Minerals File
FROM: Lynn Kunzler, Reclamation Specialist 
RE: Site Inspection, American Stone, Inc., Peoa Blonde Quarry, S/043/012, Summit County, Utah

Date of Inspection: October 3, 1994
Time of Inspection: 11:00 am
Conditions: intermittent snow and rain
Participants: Lynn Kunzler, DOGM
Purpose of Inspection: Document conditions of the site.

No one was present during this inspection. This site has about 4 acres of surface disturbance. signs of recent activity were evident, including stone on pallets (with I.D. Tags) and equipment. Several photos were taken of the site to document site conditions.

From my review of the file, it had been questioned whether this site was located in section 19 (T5E, R1S), as indicated on the NOI or in section 20. Apparently this site is in section 20. The 'Park City East Quadrangle 7.5 minute topographic map (which covers this area), shows quarries in both section 19 and 20. The quarry in section 19 was not inspected. If the NOI is correct in identifying section 19 for the location of the Peoa Blonde Quarry, then American Stone, Inc. needs to amend the NOI to include this site as well (under the Division's neighboring and related sites policy). A follow-up inspection needs to be made to verify the existence (or non-existence) of a quarry in section 19.

A second trip was made to this area on October 27, 1994 to verify location of the quarry. The quarry identified on the quad map in section 19 was located. it was less than .25 acre and there was no evidence of recent disturbance. It appeared that this quarry had not been worked for at least 15-20 years. No other quarries in Section 19 exist. From this second inspection, it is concluded that Mr. Thomas's NOI incorrectly identifies the location of the Peoa Blonde Quarry. Mr. Thomas will be contacted to correct the legal description on the NOI.
